

SET 3

EXPERIMENT – 1:

The screenshot shows the RGui interface with the R Console window open. The console displays the R startup message, including the version (4.6.1), copyright (2026 The R Foundation), and platform (x86_64-w64-mingw32/x64). It also shows the license information and a message that the previously saved workspace has been restored. The console then executes a script named 'Minmax.r' located at 'C:\Users\Meena\Downloads\DWDM LAB PRACTICE\Minmax.r'. The output of the script is a single row of seven numerical values: 0.00000000, 0.02985075, 0.32835821, 0.55223881, 0.77611940, 1.00000000, and 1.00000000.

EXPERIMENT – 2:

The screenshot shows the RGui interface with the R Console window open. The console displays the R startup message, including the version (4.6.1), copyright (2026 The R Foundation), and platform (x86_64-w64-mingw32/x64). It also shows the license information and a message that the previously saved workspace has been restored. The console then executes a script named 'set 3.2.r' located at 'C:\Users\Meena\Downloads\DWDM LAB PRACTICE\set 3.2.r'. The output of the script is a single row of five numerical values: 0.125, 0.250, 0.375, 0.500, and 0.750.
